Suggested Applications

- Presentations
- Photography
- Posters
- Graphic Art
- Reproduction
- POS Signage
- CAD
- Exhibition graphics
- Desktop publishing

Can be used on all commercial thermal and piezo water-based printing systems like Epson, Canon, Hewlett-Packard, Kodak, Encad etc.

Paper Handling

- Fine Art papers are fragile and need to be handled with care. Try not to touch the surface of the paper.
- Glossy papers will mark more easily with grease from your fingertips.
- Leave papers open to the air to fully dry for a few hours after printing, (24 hours are recommended) and avoid stacking on top of each other straight away.
- A giclée varnish or spray will help protect your print further from damage, effects of UV light and environmental attack.

Storage and Conditions of Use

- Store material only in original boxes, out of direct sunlight under normal climatic conditions (23°, 50% RH).
- You can improve results by using the best possible printer settings.
- Return unused paper to the original box and store flat. If storing the paper outside the original box, only use archival packaging.
